

RC3™

The Reinke RC3™ is a remote management device that is designed to remotely monitor and control irrigation equipment. It puts the power of efficiency and productivity in the grower's hands. With RC3 and ReinCloud® 3 working together, the data works for the grower. Managing irrigation systems remotely has become more convenient.

BENEFITS

- ▲ Advanced control
- ▲ Coverage
- ▲ Powered by ReinCloud
- ▲ Built to last
- ▲ Compatibility

ADVANCEMENTS

- ▲ The RC3 hardware family provides solutions for connecting all electric pivots to ReinCloud telemetry, regardless of panel type.
- ▲ Allows the grower to choose the level of control that best suits their needs.
- ▲ Ease of installation, RC3 devices can be installed within minutes.
- ▲ The devices come with the Reinke "sealed enclosure" design, and has an industry-leading 3-year warranty.

RC3 EOS

RC3 WELL

RC3™ EOS

The device works with most pivot brands, and is designed for durable performance. It is for users wanting advanced machine controls such as, speed, direction, end gun/auxiliary and stop functions.

RC3™ ULTIMATE

It is designed to give complete remote control of machines equipped with Reinke's RPM Advanced Plus™ or Touch Screen panels.

RC3™ WELL

Seamlessly connect water management equipment to ReinCloud, enabling real-time water usage, and coordination with irrigation systems.

RC3™ DUAL

The RC3™ DUAL is comprised of an RC3 EOS mounted on the last tower of the machine, and an RC3 ULTIMATE mounted at the main control panel. It also includes an RC3 expansion module to provide additional sensor inputs.
